Key Systems GFMS®

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installs. Systems integration and simple design for high security, low maintenance applications are cornerstones of our philosophy towards system management.

Key Systems, Inc. will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.

Software Features

Browser Based Global Access

Built-in functionality allows for use of any web enabled device (PC, laptop, smart phone) to manage and monitor your GFMS™ database as well as alarms and system status.

Real Time Event Processing

GFMS™ processes all SAM™ events in real time for instant access to alarms and event monitoring.

Time Zone Management Worldwide

Whether the boundaries of your system extend across the country or around the world, GFMS™ Software gives you the ability to synchronize time zone information to ensure accurate reporting and asset accessibility.

Automatic Alerts and Report Scheduling

GFMS™ Software allows you to schedule transaction reports for delivery to your inbox automatically. Additionally you may configure automated SMS or email alerts for critical notifications or simply to remind a user to return a key.

Custom Administration Roles

Delegate control of keys and users within your organization via GFMS System groups. Administrators can be assigned systems to run and their view and control limited only to those systems within the GFMS database.

Multi-User Rule Engine

The powerful GFMS™ rules engine enables the creation of unique, custom made access rules to ensure that high security assets are never removed by any single user.

Software/Firmware Updates

As GFMS™ evolves to meet your needs, updates to your system can be handled remotely in minutes without any interruption in the operation of your system. Firmware updates to your hardware are handled directly through the GFMS™ Software.

GFMS Server Requirements

- Microsoft® Windows Server® 2016 / 2012 / 2008 R2 / Microsoft® Windows® 8 / 8.1 / 10
- 5 GB hard disk space reserved for database; 2 GB RAM
- 100 MB wired network connection

GFMS™ Install

- GFMS™ manages and monitors all Key Systems, Inc. electronic cabinets
- GFMS™ is database portable and may be implemented with our included database install or your existing data management infrastructure (Examples include SQL2005, SQL2008)
- Our browser based software eliminates the need for client install of GFMS™. Alternatives to our included software web server may be used to host GFMS™ (Examples include IIS6, IIS7)
- Built-in encryption may be extended for secured http

Standalone: Worry Free Scalability

GFMS has a single customer site license. You never have to worry about how many devices or users you add. There are no additional costs. **Ever**.

And because GFMS is a browser app, you get the great performance and easy-to-use interface without the headache of client installations and maintenance on your workstations.

Protect your assets. Without the hassles.
