

# GFMS

# Integrator

Key Systems, Inc.'s GFMS Integrator is a secure platform for two way data sharing between GFMS™ and your existing facility management software. This new release is a software only update available to new and existing GFMS™ customers alike.

Our new platform removes the need to manage GFMS™ as a secondary software interface. GFMS Integrator provides access to GFMS alarms, user and group information, key transactions, and more. You are also able to add and edit data within GFMS through GFMS Integrator. This would include adding users to GFMS and changing user data (like updating a Badge ID). Avoid updates to redundant user data and eliminate physical relays to your facilities monitoring systems.

### GFMS OnGuard® Driver Features:

Alarm Description	Time/Date
USER SAM LOGIN Jeffrey Goldberg	1:57 PM 6/5/2013
ASSET RETURNED (2 - Position 2) Jeffrey Goldberg	1:57 PM 6/5/2013
USER SAM LOGOUT Jeffrey Goldberg	1:57 PM 6/5/2013
USER SAM LOGIN Jeffrey Goldberg	1:57 PM 6/5/2013
ASSET REMOVED (5 - Position 5) Jeffrey Goldberg	1:57 PM 6/5/2013
USER SAM LOGOUT Jeffrey Goldberg	1:58 PM 6/5/2013

### GFMS events appear in OnGuard® Alarm Monitor

- Events, key and asset tracking, and alarms sortable and actionable
- Enforce anti passback rules on key removals
- Use Global I/O to have OnGuard® take action on GFMS events

### OnGuard® user modifications update to GFMS in real-time

- OnGuard® cardholder and badge updates sync immediately to GFMS
- Assign access to keys and assets as access levels
- Ease administrative burden as all management is done through OnGuard®

### Requirements & Specifications

Key Systems, Inc. combines the integration capabilities of the OnGuard® DataConduit™ service available to Lenel customers with our own integration module, GFMS Integrator. This provides a rich, stable environment for data sharing between the two software systems.

GFMS v1.5b certified with OnGuard® 6.3.249 and 6.4.500

GFMS v2.1 certified with OnGuard® 6.5.624 and 6.6.287

GFMS v2.5 certified with OnGuard® 7.1.481, 7.2.269 and 7.3.292

All versions require OnGuard® DataConduit™

The GFMS Integrator OnGuard® Driver is built on top of the functionality provided by the GFMS Integrator. It interfaces with the Lenel OnGuard® DataConduit™ platform, sharing data between both and OnGuard® through configurable features set by the customer.
