

The SWATBox™

Remote Access

The SWATBox™ features an embedded install which conceals physical assets within your facility wall and away from public view. Use PIN, ID device, biometric finger scan or any web enabled device (e.g., laptop, smart phone) to gain access to assets on the spot. Our solar powered model allows you to secure and monitor assets in remote or unmanned locations.

- *Key Positions are Latched & Monitored*
- *Operational With Your Access Control*
- *Network / Web Enabled*
- *Surface or Flush Mount*
- *Battery Backup*
- *GFMS Ready*

One or Two Fobs

Key & Card

Cavity for Asset Storage

SWATBox™ With ID Device

Integrate your existing ID device with our SWATBox™. Your employee's current IDs are all that are needed for one step access.

Direct Control SWATBox™

Your Access Control Ready Solutions

The SWATBox is also available in "Direct Control" versions. These are units from which the embedded systems that power our standard devices are omitted. This option can appeal to those who seek direct control over every position and door of a device without intermediary computing hardware and/or software. Direct Control SAM is ready for access control, featuring clearly marked pass-through row boards with screw terminals for easy connection to an existing control system. In addition, Direct Control SAM can include almost all options* found in the standard SAM line, such as a variety of lock types, direct entrapment of important or master keys, compatibility with Tamper-Proof Key Rings®, and more.

This Direct Control SWATBox is housed in our same high strength shell but operates solely on an external signal from your existing access control system. Provide your own 12volt pulse to open the SWATBox™ NE on command.

Direct control is also available for KSI Security Asset Managers.

Global Facilities Management System

GFMS™ combines sophisticated and adaptable, web enabled, PC-based software with no client installs. Dynamic integration and custom application are cornerstones of our philosophy towards system management.

Key Systems, Inc. will help you formulate an asset management strategy specific to your facility's requirements, regardless of size, scope and pre-existing technology.
